

## Lectotype selection for South Asiatic Microlepidoptera

by

A. DIAKONOFF

*Rijksmuseum van Natuurlijke Historie, Leiden*

In some of my early papers descriptions of new species have not been accompanied by specific indication of holotypes. In order better to adjust those descriptions to modern requirements I present a list of selections of lectotypes for the species concerned.

The species are arranged in alphabetical order. The lectotypes themselves are marked accordingly and deposited in the Muséum National d'Histoire Naturelle, Paris, France (PM), in the Zoologisches Museum der Humboldt-Universität, Berlin, D.D.R. (HMB) and in the Rijksmuseum van Natuurlijke Historie, Leiden (LM).

All specimens are provided with my lectotype labels and genitalia nos. labels. These are omitted from the text.
